

Fall Means Color

Often thought of as the end of the gardening season, fall is really one of the most colorful seasons of the year. During this time, the trees put on their best show of scarlets, reds, oranges, golds and purples. Fall-flowering perennials provide spectacular blooms while ornamental grasses wave their plumage in the landscape. To add additional color in beds, borders and containers, plant mums, pansies, ornamental cabbage and kale. Feed plants regularly with Schultz Bloom Plus or Jack's Blossom Booster and remove spent flowers to extend bloom time. This fall, show your true colors by adding some fall color to your garden.

Red Fall Color

Trees:

- Acer species (Maples)
- Cornus florida (Dogwood)
- Cornus kousa (Kousa Dogwood)
- Cotinus coggygria (Smokebush)
